Profile

Data Scientist with four years of experience in analytics, data visualisation, and machine learning, passionate about leveraging data to drive measurable business outcomes and development impact. Experienced in designing end-to-end data workflows, building and deploying predictive models, and translating analytical findings into actionable insights for programme and business improvement. Skilled in statistical modelling, data pipeline development, and cross-functional collaboration to enhance performance, accountability, and data-driven decision-making.

Work Experience

11/2024 – Present
Abuja

Data Analyst *StanforteEdge*

- Managed the entire data lifecycle for the Access 360 Disability Data Centre, overseeing data collection, cleaning, and maintenance to ensure quality and accuracy for inclusion advocacy in Nigeria.
- Conducted exploratory data analysis and statistical modelling to uncover patterns and insights that informed state-level inclusion rankings for the First State of State Disability Inclusion Report in Nigeria.
- Collaborated with research and programme teams to translate analytical results into actionable recommendations for advocacy and policy formulation.
- Developed dashboards and data visualisations using Power BI and Tableau to communicate findings effectively to technical and non-technical stakeholders.

01/2022 – 08/2024
Lagos, Nigeria
(Remote)

Data Scientist *Hacey*

- Built predictive segmentation models using Python (Scikit-learn) on the EfinA A2F dataset, identifying high-risk financial exclusion segments that directly informed the evidence-based HACEY FEED programme design targeting women and girls in marginalised communities.
- Developed and optimised data pipelines using Python and SQL, improving model accuracy and reducing preprocessing time by 30%.
- Built and deployed mobile-first data collection systems (ODK/KoboToolbox) integrated with back-end databases and automated reporting pipelines, enabling real-time decision-making by programme leadership in low-connectivity environments.
- Conducted statistical analysis of community surveys to identify unmet health needs and created data-driven advocacy tools that translated community feedback into actionable policy evidence.
- Built interactive dashboards for low-resource settings using Power BI and Tableau, ensuring real-time insights for decision-makers.
- Collaborated with cross-functional teams to integrate community data into programme planning and policy advocacy, directly influencing maternal and adolescent health funding across several states.

Education

2018 – 2024
Ile-Ife, Nigeria
05/2022 – 07/2022

B.SC Quantity Surveying *Obafemi Awolowo University*

ELEMENTS OF DATA SCIENCE *AMAZON WEB SERVICES*

07/2021 – 07/2022

CERTIFIED DATA ANALYST SPECIALIZATION *IBM*

07/2021 – 07/2022 **CERTIFIED DATA SCIENCE SPECIALIZATION**
IBM

07/2021 – 07/2022 **CERTIFIED DATA ANALYST SPECIALIZATION**
Google

Skills

Technical Skills — Languages | Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL, R (basic) | **Full-Stack Data** | End-to-end pipeline design, ETL development, API integration, automated reporting, KoboToolbox / ODK mobile data systems | **Visualisation** | Power BI, Tableau, IBM Watson, Microsoft Excel (advanced), custom dashboard development | **Machine Learning** | Supervised/unsupervised learning, predictive modelling, segmentation analysis, feature engineering, statistical modelling & inferential statistics | **Databases** | PostgreSQL, MySQL, cloud data storage, data quality & governance | **Interoperability** | Cross-system data integration, fragmented IT environments, REST API consumption, data standardisation | **Reporting** | Executive dashboards, briefing papers, statutory reports, policy briefs for senior leadership | **Interpersonal Skills** — Multitasking | Time management | Analytical skills

Core Competencies

Data-Driven Decision Making
Research & Evaluation
Dashboard Design
Policy & Development Analytics
Business Impact Modelling
Cross-Team Collaboration
Certificates

CERTIFIED DATA ANALYST SPECIALIZATION — IBM, CERTIFIED DATA SCIENCE SPECIALIZATION — IBM, AWS ELEMENTS OF DATA SCIENCE, DATA ANALYSIS SPECIALIZATION — GOOGLE

Volunteer

10/2023 – 04/2024
Abuja, Nigeria

Intern

Nigeria Mental Health

- Supported collection, cleaning, and analysis of survey and clinical data for mental health research and policy advocacy.
- Conducted exploratory analysis and applied statistical methods to identify emerging trends in mental health data.
- Collaborated with research teams and clinicians to ensure data accuracy and relevance to programme objectives.
